

TELX SIGNS 1000TH CUSTOMER INSTALLATION TO ITS GLOBAL MARKETPLACE; ANNOUNCES 25,000TH INTERCONNECTION

Achievement of new corporate milestones confirm company's market leadership

Key Highlights:

- Telx signs 1000th customer to its global marketplace of available networks, service providers, financial, enterprises, and media companies.
- Company makes its 25,000th cross-connection across all its facilities.
- Milestones validate Telx's strength and expertise in the colocation and interconnection markets.

New York, NY (July 23, 2009) – [Telx](#), one of the largest and fastest growing domestic interconnection and colocation data center operators, announced today that it has installed its 1000th customer presence and completed its 25,000th cross-connection within its facilities, creating one of the industry's largest global marketplaces of colocation and interconnection customers.

"This milestone is proof that Telx is a strong leader in the colocation and interconnection services industry and is providing a valuable, cost-effective solution for businesses needing to connect to multiple carriers, service providers and enterprises," said Eric Shepcaro, Chief Executive Officer for Telx. "Outsourcing space and connectivity to third-party experts such as Telx, which can provide extremely low latency connectivity and efficient cross-connections at an effective price point and low overhead, is a growing trend, especially for companies in the financial services and software-as-a-service sectors, which require high reliability and low latency to maintain a competitive edge in business."

According to Tier 1 Research's *'09 Mid Year Colocation Report*, a leading research firm, availability of premium data center space in major U.S. cities, coupled with its fast, efficient cross-connection and deep industry knowledge and expertise makes Telx a premier provider for customers seeking low latency, highly reliable connections in the country's most sought-after locations.

"The Internet Datacenter market is growing quickly even in the worst of economic times, fueled by enterprises desiring to reduce capital expense while increasing reliability and cutting network costs. Carrier neutral datacenters with rich interconnection capabilities are a vital element in any enterprise effort to radically reduce network costs and increase uptime," said Dan Golding Vice President of Tier 1 Research.

First National Bank of Trenton was the 1000th installation in Telx's Dallas TX facility.

"We are pleasantly surprised that we were Telx's 1000th customer installation," said Danna Swindell, Assistant Vice President of First National Bank of Trenton. "As our business continues to grow, we needed a reliable and cost-effective solution. Telx was the right choice for us."

###
